PREPARE BETTER.
LIVE CONFIDENTLY.

REAL FOOD.
REAL NUTRITION.

BUILT FOR TODAY.
READY FOR TOMORROW.

THE PROBLEM

The Existing Food System Is Fragile

→ Households Are Exposed

The average American household has less than 2 weeks of food on hand — one crisis away from empty shelves.

→ Disruption Is the New Normal

Supply chain shocks, extreme weather, and inflation spikes have made food vulnerability a mainstream reality.

→ Existing Options Fall Short

Emergency food is tasteless, nutritionally poor, or built for survivalists — not modern families seeking quality.

→ The Premium Gap Is Wide Open

No brand has built a beautiful, everyday-quality long-term food system for the mainstream consumer. Until now.

THE INSIGHT

Freeze Drying Changes Everything

Freeze drying removes **98% of moisture** while preserving nutritional content, flavor, and texture better than any other preservation method. Combined with advances in packaging technology — vacuum sealing, oxygen absorbers, Mylar barrier lining, and nitrogen flushing — shelf lives of **25–30 years** are achievable without a single preservative.

Paired with dry staples like rice, beans, and oats, Everstock™ delivers a nutritionally complete system that requires nothing but water and heat.

- ❑ This isn't survival food. This is real food with an expiration date your grandchildren might enjoy.

THE SOLUTION

Everstock™ — Built Around Real Nutritional Needs

Thryve Foods' flagship product: a tiered, 30-day food security system built around freeze-dried proteins, vegetables, and staples — designed for maximum shelf life and real families.

Nutritionally Complete

2,000+ kcal/day, macro-balanced for sustained energy

Actually Tastes Good

Real food flavor and texture — not cardboard

Compact by Design

Fits in a standard closet — no bunker required

Premium Enough to Gift

Elevated packaging that works as a thoughtful, high-value gift

PRODUCT ARCHITECTURE

Four Tiers. One Complete System.

Core Tier — The Foundation

1 adult · 30 days · ~2,100 kcal/day. Freeze-dried chicken, black beans, lentils, rice, oats, and flavor basics.

25-year shelf life.

Vitality Add-On

Immunity, antioxidants, and energy. Freeze-dried berries, banana slices, and vitamin C-rich tropical fruit blend.

Comfort Add-On

Because morale matters. Single-origin cocoa, sweetened oat clusters, vanilla and cinnamon flavor packets.

Premium Add-On

Healthy fats, culinary quality. Cold-pressed olive oil in nitrogen-flushed aluminum cans, avocado oil packets, coconut milk powder.

Packaging Is a Core Competitive Advantage

Technology	Function	Benefit
Mylar barrier bags	Blocks light, moisture, O ₂	+15–20 yr shelf life
300cc O ₂ absorbers	Reduces O ₂ to <0.1%	Prevents oxidation
Nitrogen flushing	Displaces residual oxygen	Preserves flavor & color
Vacuum sealing	Reduces microbial activity	Prevents spoilage
BPA-free PETE buckets	Structural protection	Stackable, durable
QR-coded labels	Prep instructions + recipes	Premium UX

All packaging is food-grade, BPA-free, and rated for -20°F to 100°F temperature ranges.

THE MARKET

Food Security Is a Mainstream Megatrend

\$12.7B

U.S. Preparedness Market

2023 market size — and growing

\$6.5B

Freeze-Dried Food by 2028

8.3% CAGR projected through 2028

67%

Increased Food Security Awareness

Of Americans say COVID-19 made them rethink food security

43M

Target Households

U.S. households with children — our primary segment

Beachhead customer: Health-conscious, middle-to-upper-income households aged 30–55 seeking practical preparedness — without the prepper aesthetic. Adjacent markets include outdoor/camping (\$3.7B), corporate gifting, and government procurement.

DTC First. B2B in Year 2.

Product	Price	Description
Everstock™ Core Kit	\$299	1-person, 30-day system
Annual Refresh Sub	\$249/yr	Auto-ship replacement
Everstock™ Bundle	\$349–\$499	Core + 1–3 add-ons
Family Pack	\$499–\$799	30-day system for two
Gift Box	\$149	Curated 2-week starter kit

Bundle-First Positioning

The site defaults to bundle views. A **"Save \$30 when you add Vitality"** prompt and a gift-with-purchase threshold at \$349+ are built into the launch experience to drive AOV from day one.

Year 2 Revenue Levers

Corporate gifting, property manager kits, HOA partnerships, and select wholesale — REI, Costco.

~62% Gross Margin at Launch

Everstock™ Core Kit — Cost Breakdown

Line Item	Cost	% of COGS
Freeze-dried ingredients	\$68	60%
Packaging (Mylar, O ₂ , bucket)	\$14	12%
Assembly + labor	\$9	8%
Fulfillment + shipping	\$22	20%
Total COGS	\$113	100%
Retail Price	\$299	—
Gross Margin	~62%	—

- 1

Bundled Order AOV
Avg \$360 · COGS ~\$140 · **Gross Margin ~61%**
- 2

CAC Target
\$35–\$55 via earned media first, paid acquisition from Month 3
- 3

LTV:CAC Ratio
~\$420 LTV over 3 years (annual refresh + 1 add-on) → **~8:1 ratio**

We Sell Before We Manufacture

1 De-Risk Inventory

Production only begins once demand is validated — no blind manufacturing commitment on the \$110K budget.

2 \$50K–\$70K Revenue Before COGS

150–200 pre-orders generate meaningful cash before a dollar of production spend is committed.

3 Build a Founding Community

Early buyers become advocates and reviewers — earned media from people with skin in the game.

4 Compress Path to Profitability

Cash collected upfront funds part of the production run itself, shortening the capital cycle significantly.

Raising \$500,000 — Pre-Seed SAFE or Convertible Note

Category	%	Notes
First production run (~1000 units)	44%	Partially offset by pre-orders
Marketing — content & paid	22%	Earned first, paid from Month 3
Packaging design & materials	16%	Structural design, print, O ₂ absorbers
Legal, compliance & food certs	8%	Entity, trademarks, FDA compliance
Operating reserve	7%	Buffer for contingencies
Website & e-comm platform	3%	Licensing only — built in-house

Website and platform infrastructure is built in-house by the founding team, reducing this line to Shopify, Klaviyo, and subscription tooling licensing only.

Designed to Be Profitable Within the Pre-Seed Round

■ Revenue (\$)

■ Gross Profit (\$)

■ Net Income (\$)

Breakeven: ~540 units at \$340 AOV — achievable through the pre-order campaign alone plus modest paid acquisition. We enter the seed round with proof of profitability, not just proof of concept.

Clear Targets. Sequenced Execution.

How Pre-Seed Sets Up a \$1.5M Seed Round

Seed Round Unlocks

With proof points in hand, the \$1.5M seed round funds:

- Full marketing scale and paid channel expansion
- Second production run — 2,500 units
- First signed B2B contract
- Wholesale channel conversations with REI and Costco

700+ Units Sold

Proven demand at scale — not just a concept

Positive Net Income

Unit economics validated in-market, not in a model

Real LTV Data

Subscription cohort live with actual retention figures

CAC Validated

Across both earned and paid channels

B2B Pilots Initiated

2–3 corporate account conversations underway

📌 We arrive at the seed round with data, not promises.

Legacy Players Are Product Companies. Thryve Is a Brand.

Our moat: Brand positioning, tier architecture, packaging innovation, and subscription model. The aesthetic and positioning gap is wide open.

Five Forces Have Aligned — The Window Is Open

01

Post-COVID Behavioral Shift

Preparedness is now mainstream, not fringe — household food security has entered the cultural conversation permanently.

02

Freeze-Drying Costs Down ~40%

Commercial equipment scale globally has dramatically reduced the cost basis for premium freeze-dried production.

03

Packaging Technology Threshold Crossed

25-year shelf life is now commercially viable at consumer price points — not just in defense or institutional contexts.

04

DTC Infrastructure Is Mature

Shopify, 3PLs, and performance marketing make this buildable lean and capital-efficient from day one.

05

No Premium Brand Has Claimed This Space

The aesthetic and positioning gap is wide open. The first mover who owns it wins it.

THE TEAM

Operational Experience. Commercial Relationships. International Reach.

Key Team Strengths

Full-Stack Technical Capability

Website, e-commerce, and subscription platform built entirely in-house — saving \$22K+ in dev costs

International Trade Experience

Hands-on cross-border logistics and import/export operations across complex markets

International Government Relationships

Established relationships with public and private sector partners in the Gulf Cooperation Council region

Regulatory Fluency

Food import regulations, halal certification pathways, and sovereign procurement processes

Thryve Foods — Creators of Everstock™

We are building the first premium food security brand for the modern family — starting with a lean, capital-efficient, profitable DTC model, and growing toward a global platform with institutional reach.

The freezer aisle expires. Canned goods rust. We built something better.

Real Food

Nutritionally complete, genuinely delicious

Real Shelf Life

25 years. No preservatives. No compromise.

Real Peace of Mind

For families who prepare — and investors who see it coming
